First is the silicone seal that keeps food and liquids airtight. Second is the save-the-date ring so you can quickly see when you filled the jar. Third, pull up the silicone button to release air when you put on the lid, then push it down to keep air out. And fourth, the automatic vent valve releases any pressure that builds up inside. THE DRIPLESS

OIL BOTTLE SILICONE BRUSH

The usual method: Pour on the oil, then spread it with a separate brush or utensil. The better way: Use the ONE STEP! The silicone brush allows you to control the amount you need. When you're done, the excess oil drains back into the bottle. A special stopper in the twist-on lid keeps the oil from leaking.

- Special lid keeps oil from leaking into the brush.
- Excess oil drains back into the bottle.

BBQ season is here, and oil is important for at least two reasons. One, you need to oil the grill surface so meat doesn't stick. Two, sometimes a little oil keeps the meat moist and flavorful. The easiest, most comfortable way to do both of those is with our new BBQ BUDDY mister. You don't need to brush on the oil, or get your hands too close to the grill. A couple of firm presses on the lid will give a delicious result. Also great for salads.
